SHUTTLE MINE

★ **SHUTTLE MINE IS AN INNOVATIVE
DEFI ON BINANCE SMART CHAIN UPTO
8% DAILY RETURN AND 13% REFERRAL
BONUS ON 3 LEVELS
FULLY VERIFIED AND AUDITED
CONTRACT**

WHAT IS THE PRICE OF SHUTTLE?

SHUTTLES DO NOT HAVE A SET PRICE.
HIGHER TVL MEANS MORE SHUTTLES
PER BNB, LOWER TVL LESS SHUTTLES.
THIS CREATES LEVEL PLAYING FIELD
SO NO USER CAN BE LATE. THERE IS NO
CALCULATOR AVAILABLE TO WORK
THIS OUT.

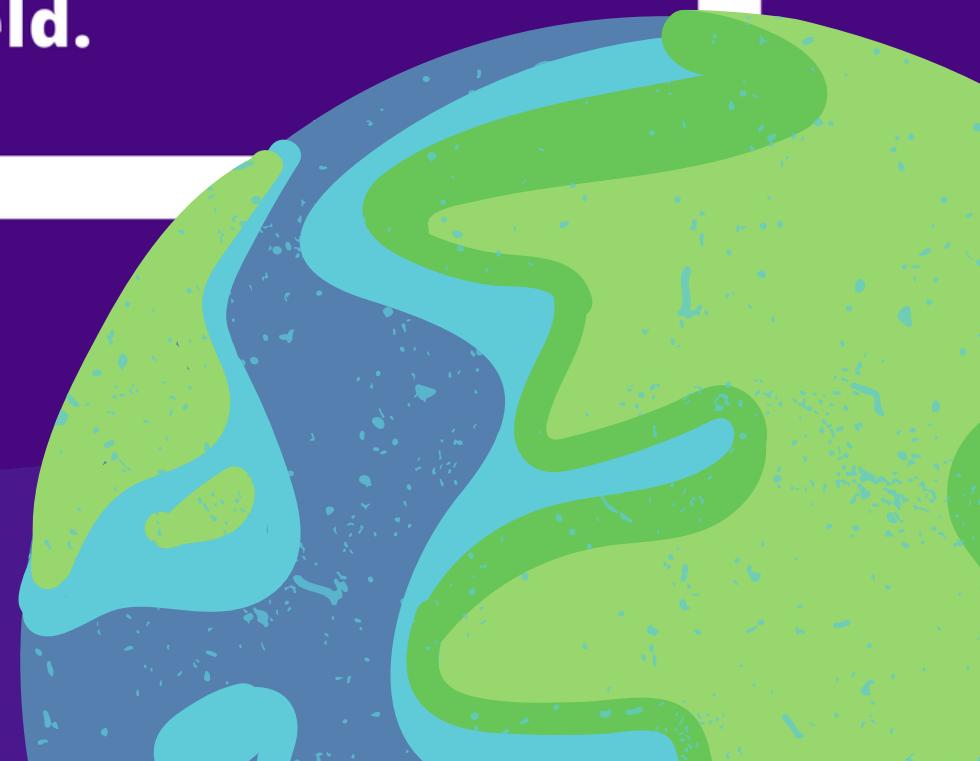

WHAT IS THE BNB SHUTTLE MINE?

ShuttleMine is a decentralized application built on the Binance Smart Chain. The object of the game is to launch your shuttle sooner and more often than other shuttles. This in turn earns you more BNB faster. Your shuttle will travel as fast as it can, giving you a daily average of 8% of your farmers' value.

The daily percentage return depends on the shuttle actions that are taken within the platform that impact the shuttle efficiency rate. The shuttle efficiency rate rises and falls as users take-off, boost your earnings and descend for BNB.

Once the shuttle is Bought, it cannot be sold, and the investment made to boost it (either through take-off or boost) cannot be taken back. However, once bought, Shuttle will not stop producing yield.

HOW DOES THIS PLATFORM WORK?

This platform work similarly to a financial market, where an asset has intrinsic value that is relative to the supply or demand of said asset.

Shuttle is purchased with a pre-determined currency at a price relative to the Shuttle current travel efficiency rate. After the Shuttle is purchased, it takes-off for you right away to give you the best yield on your investment possible, for as long as possible.

Just as any other asset bought and sold on an open market, the price of a Shuttle will fluctuate over time, as will the travel efficiency rate, as you and other users buy Shuttles, compound earnings and sell earnings.

To put it plainly, the more demand for the Shuttles boosted, the more they will increase in value and the more yield they will produce. Inversely, when the demand decreases, so will the value of the Shuttles and their daily return on investment.

The main difference between a this game and a traditional financial market is that a recruited Shuttle cannot be sold, only the value they provide can be sold.

As the Shuttles of the game as a whole compound their earnings and make new deposits, the game efficiency rate will stay relatively constant, but the moment Shuttles start to sell more than they are compounding, the efficiency rate will begin to drop as to preserve the TVL and longevity of the game.

WHAT MAKES IT DIFFERENT FROM OTHER SIMILAR PLATFORMS?

ShuttleMine has several anti-dumping and anti-whale measures in place to ensure the longevity of the project. These measures include maximum deposits, as well as a cutoff time AND a cooldown time for withdrawals.

The cutoff time is the amount of time it will take for your "Shuttle Reward" to be full of rewards. Once the bag is full, it will stop filling until you've taken some action in the game. This is to prevent whales from letting their rewards accumulate for a long time, and removes the false impression the contract value is going up when most of it is rewards the whale is waiting to withdraw at once.

The withdraw cooldown time is the amount of time one has to wait before they can make another withdrawal. This also prevents the contract balance from decreasing in value too fast. If the team decides it's necessary to protect the contract balance, this time period can be adjusted to slow down the rate of withdrawals, but it can only be set to a value less than or equal to 24 hours (per contract rules).

The compound count is the number of times the user has compounded. By default, the required compound count by the platform is 10, meaning the user will have to compound 10 times(compound once every 12 hours) before they can withdraw without the feedback tax of 35%. This feature in essence will ensure the longevity and stability of the project.

To reward users who compound, there is a bonus when you boost your daily Shuttle earnings instead of selling them. The bonus increases 2% every 12 hours that you compound without withdrawing (20% max after 5 days). This incentivizes the user to compound more often, which will help boost the Shuttle efficiency rate in the long run. To be able to utilize the boost bonus feature, the player must not compound before the provided timer reaches 00:00:00.

For the players who choose to not play the game and only sell, there will be a 35% tax on those sells that will stay in the contract. If the player makes two or more consecutive sells, this tax will be applied. The only way for the user to not pay the 35% tax is to compound 10 times before making another withdrawal.

ShuttleMine also has a very unique feature that has never been done before which effectively decreases the amount of shuttle inflation that occurs over a long period of time. Every sell action will only add 50% of the amount sold to the total supply. Older miner add 100% of what is sold to the total supply. This means the contract will have a lower inflation rate, keeping the farmers supply more scarce and more valuable than other miner platforms.

WHAT IS THE RECOMMENDED STRATEGY?

The best strategy that the team can recommend is to boost/compound for 6 days and harvest 1 day a week.

This will increase the users investment at the same time increasing the daily yield earnings. This strategy has already been tried and tested by several project and is proven effective both for the short and long term.

WHY ARE MY REWARDS NOT GROWING?

★ DESCEND HABITS EFFECT REWARDS, IF YOU DESCEND TOO MANY TIMES YOUR DAILY PERCENTAGE DROPS. IF YOU ONLY STARTED WITH A SMALL DEPOSIT IT WILL TAKE TIME TO DISPLAY ON THE DAPP SINCE IT ONLY SHOWS 3 DECIMAL PLACES. DAILY TVL INCREASE CAN ALSO CAUSE LOWER DAILY PERCENTAGE.

WHAT HAPPENS IF I ALWAYS DESCEND MY SHUTTLES?

IF YOU ALWAYS DESCEND YOUR DAILY PERCENTAGE WILL DROP DRAMATICALLY AND YOU WILL NOT RECEIVE THE HIGHEST DAILY RETURNS. THIS IS THE ANTI-WHALE MECHANISM THAT PREVENTS WHALES FROM DRAINING THE TVL.

**IS BOOSTING
MORE OFTEN
BETTER, 2 OR 3
TIMES A DAY?**

BOOSTING IS THE SAME AS COMPOUNDING, TERM WE DECIDED TO USE.
SO
**ESSENTIALLY YES. YOU WILL NEED TO PAY
STANDARD BNB
GAS FEES FOR EVERY RE-FUEL.**

**WHAT ARE
SHUTTLES?**

★ SHUTTLES ARE THE MINERS THAT ARE HIRED WITH BNB AND WORK TO GET YOUR REWARDS. THIS IS JUST A

TERM WE DECIDED TO USE.

CAN I GET MY INITIAL BACK?

SHUTTLEMINE IS A LOCKED REWARDS POOL, SO NO. YOU GET YOUR INITIAL BACK OVER TIME THROUGH THE MY REWARDS SECTION OF THE DAPP

WHAT ARE THE FEES?

THERE IS 3% DEV FEE TAKEN UPON ALL DEPOSITS AND WITHDRAWALS FROM SHUTTLEMINE. STANDARD BNB NETWORK GAS FEES ARE REQUIRED FOR EVERY TRANSACTION MADE: DEPOSITS, WITHDRAWS AND COMPOUNDING!

DO SHUTTLES AMOUNT DECREASE WHEN YOU LAND?

NO, THE SHUTTLES AMOUNT WILL NOT CHANGE. IF YOU MAKE A NEW DEPOSIT OR BOOST THE AMOUNT WILL INCREASE BUT NOT WHEN YOU DESCEND (TAKE REWARDS). THE SHUTTLES ARE LESS EFFICIENT OVER TIME IF YOU DESCEND TOO OFTEN.

SHUTTLE
MINE

IS THIS SUSTAINABLE?

YES, AS LONG AS THERE IS TVL IN THE CONTRACT THEN THERE WILL ALWAYS BE REWARDS. THE HUNGRY PEOPLE WHO DESCEND TOO MUCH GET PUNISHED AND GET LOWER AND LOWER REWARDS. IT WILL LAST A LONG TIME THE HIGHER THE TVL IS.

WHAT PREVENTS THE DEVS FROM RUG PULLING?

THE CONTRACT IS IMMUTABLE AND FULLY AUDITED BY HAZE CRYPTO SECURITY. THEREFORE IT CANNOT BE CHANGED OR ALTERED IN ANY WAY. IT IS AUDITED AND VERIFIED. YOU CAN VIEW THIS ON BSCSCAN. COM AND THE AUDIT IT IS FOUND ON THE WEBSITE OF HAZE CRYPTO SECURITY.

THE 6/1 STRATEGY EXPLAINED?

THESE CONTRACTS WORK VERY WELL WHEN THE COMMUNITY FOLLOWS THE 6/1 STRATEGY. THIS MEANS YOU COMPOUND (BOOST) YOUR EARNINGS OF 6 DAYS AND WITHDRAW (DESCEND) YOUR EARNINGS OF 1 DAY

IS IT TOO LATE TO INVEST?

NO, THE CONTRACT IS WRITTEN TO PROVIDE AN OPTIMAL ENTRY FOR ANY AND ALL USERS, NEW OR OLD. THIS IS THE REASON THE SHUTTLES PER BNB AMOUNT CHANGES FREQUENTLY WITH TVL FLUCTUATION TO PROVIDE AN EVEN PLAYING FIELD FOR ANY NEW USER COMING TO ROCKET GAME AND NOT GIVING THE FIRST USER/S A HEADSTART.

**CAN CONTRACT
FUNCTIONS BE
ADDED?**

**NO, THE CONTRACT IS
IMMUTABLE AND CANNOT BE
CHANGED. THE CONTRACT WORKS
PERFECTLY WELL AS IT IS.**

**DOES IT HAVE AN
ANTI WHALE
MECHANISM?**

**THE CONTRACT HAS AN IN-
BUILT ANTI-WHALE
MECHANISM. THIS WORKS AS
FOLLOWS; USER HAS
COMPOUNDED. BY DEFAULT,
THE REQUIRED COMPOUND
COUNT BY THE PLATFORM IS
10, MEANING THE USER WILL
HAVE TO COMPOUND 10
TIMES(COMPOUND ONCE EVERY
12 HOURS) BEFORE THEY CAN
WITHDRAW WITHOUT THE
FEEDBACK TAX OF 35%**

REFERAL SYSTEM

REFERRAL SYSTEM

EARN UP TO 13% COMMISSION, 3 LEVELS DEEP, IF YOU HAVE UNLOCKED YOUR LEVELS WITH THE NECESSARY MINIMUM DEPOSIT. IF YOU HAVE NOT UNLOCKED YOUR LEVELS - THE COMMISSION OF THE COMMISSIONED DEPOSIT REMAINS IN THE VERIFIED SMART CONTRACT FOR ALL PLAYERS. IT IS NOT POSSIBLE TO RECEIVE YOUR COMMISSION AFTERWARDS. THE REFERRAL REWARDS WILL BE SENT DIRECTLY TO YOUR WALLET WHEN SOMEONE DEPOSITS USING YOUR REFERRAL LINK.

HOW TO SETUP YOUR METAMASK

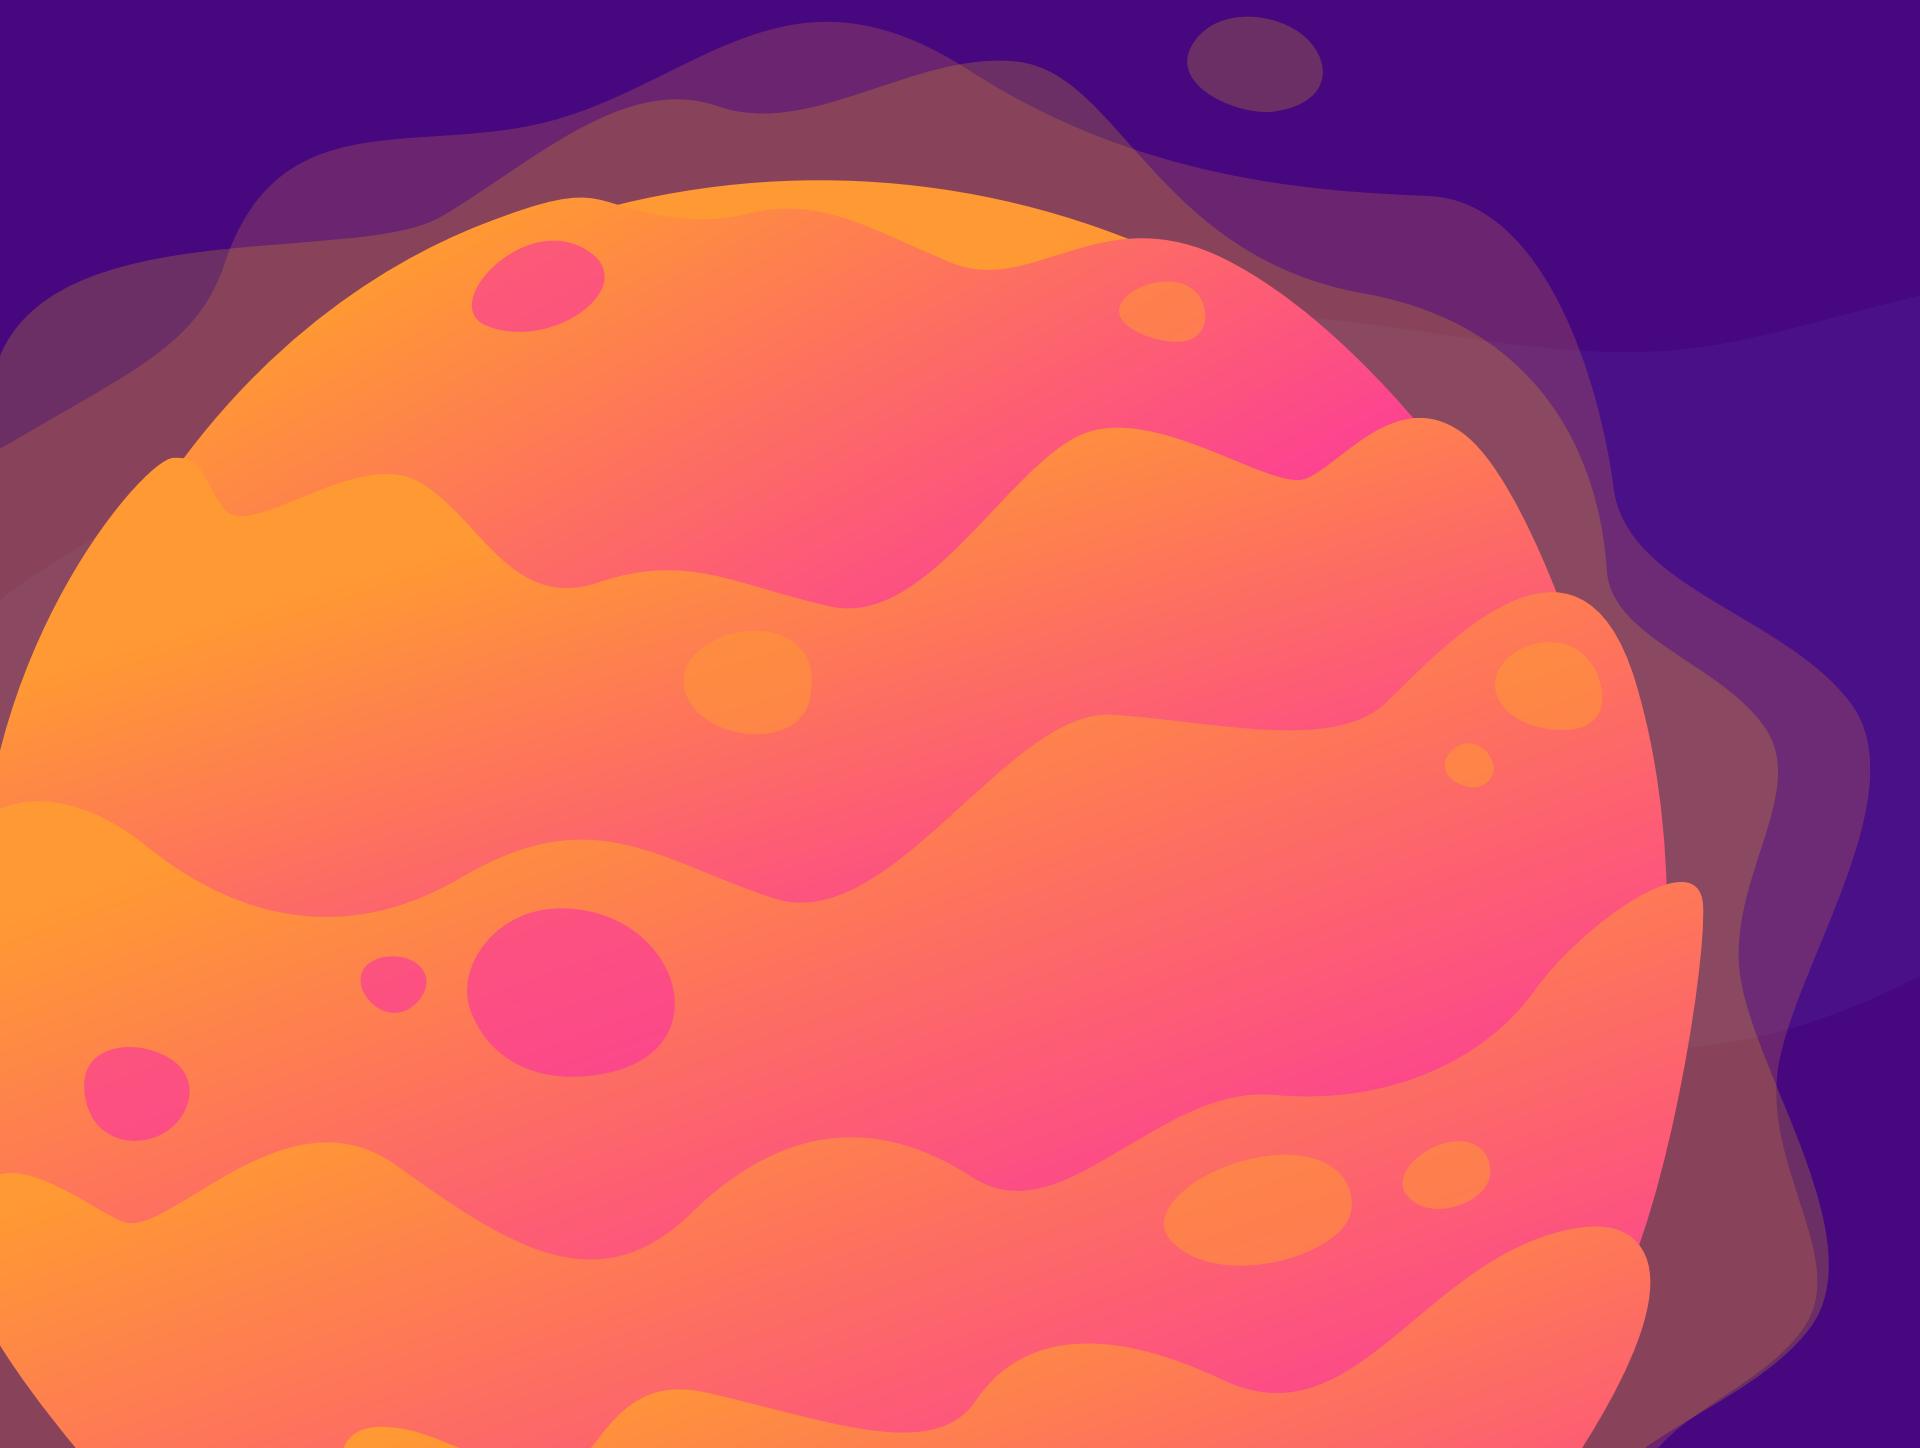

HOW TO SETUP YOUR METAMASK

FOLLOW THESE EASY STEPS TO
INTEGRATE BINANCE SMART CHAIN
INTO YOUR METAMASK WALLET.

FOLLOW THESE EASY STEPS TO
INTEGRATE BINANCE SMART CHAIN
INTO YOUR METAMASK WALLET

GO TO [HTTPS://CHAINLIST.ORG/](https://chainlist.org/) AND
SEARCH FOR „BINANCE SMART CHAIN
MAINNET“. BELOW THE BOX PRESS
„CONNECT WALLET“ AND ALLOW
METAMASK TO ADD THE NETWORK TO
YOUR WALLET.
THE BSC NETWORK SHOULD NOW BE
ADDED TO YOUR METAMASK WALLET.

HOW TO SETUP YOUR METAMASK

★ SWITCH THE NETWORK IN YOUR METAMASK WALLET GO TO [HTTPS://CHAINLIST.ORG/](https://chainlist.org/) AND SEARCH FOR "BINANCE SMART CHAIN MAINNET". BELOW THE BOX PRESS "CONNECT WALLET" AND ALLOW METAMASK TO ADD THE NETWORK TO YOUR WALLET. THE BSC NETWORK SHOULD NOW BE ADDED TO YOUR METAMASK WALLET. TO DO THIS, CLICK ON THE CURRENT NETWORK AT THE TOP OF YOUR METAMASK WALLET. THEN CLICK ON BINANCE SMART CHAIN MAINNET. DONE! YOU CAN NOW CONNECT TO OUR DAPP!

LAUNCH YOUR SHUTTLE TO THE MOON!
